ECO-TALK BOOK DISCUSSION – SEPT. 4TH

Please join the Eco-Talk book discussion group on **Thursday, September 4** at 6:30 p.m. to discuss Wendell Berry's essays about the destructive impact of agribusiness on the culture of farming and lives of farmers. GREEN NEWS

MADISON COMMUNITY FOUNDATION GRANT PHASE II

The library recently received the second installment of a two-year grant from the Madison Community Foundation (MCF). MCF is funding a library collection development project that is allowing twelve Dane County libraries to build and diversify specific collections. The Rosemary Garfoot Public Library's area of concentration is the environmental collection. Thanks to the generosity of MCF, the library has added numerous titles to this important collection.

If you are interested in contributing funds toward the environmental collection, please contact the library at 798-3881.

Portable Energy Meter

The library now has a Portable Energy Meter thanks to the generosity of Madison Gas & Electric. Accurate and easy to use, this plug-in meter works on any standard 120-volt electric appliance. Use it to:

- Measure voltage, electricity cost and electric consumption.
- Find out the exact operating cost of various appliances, from refrigerators to lamps and computers.
- Identify the potential causes of high energy use.
- Predict your savings in reducing appliance use.
- Calculate the payback for replacing older equipment.
- Discover how much power some appliances draw even when switched "off;" i.e., "phantom power."

Borrow the portable energy meter at no cost from the library. Because the meter is popular, you may want to reserve it ahead of time.

Find and/or reserve a meter online by searching for "Portable Energy Meter" in the library's online catalog at <http://www.scls.lib.wi.us/csp/>. Click on "LINKcat Web" to access the South Central Library System catalog.
